## SUNSTEIN 1S AND 2S

*Paul H. Edelman & Tracey E. George<sup>‡</sup>*

In *Six Degrees of Cass Sunstein: Collaboration Networks in Legal Scholarship*,<sup>1</sup> we began the study of the legal academy's collaboration network. When mathematicians discuss the nature of collaboration in their field they focus on the most influential collaborator in the discipline — Paul Erdős, the peripatetic Hungarian mathematician who authored over 1500 papers with over 450 different collaborators before his death in 1996. They introduced the concept of the Erdős Number, which is the number of degrees of separation between a mathematician and Erdős. Thus, a mathematician who co-authored with Erdős has Erdős number 1 and one who never co-authored with Erdős, but co-authored with someone who did, has Erdős number 2.

Reasoning by analogy, in the mathematical tradition, we began our investigation by considering which legal academic most closely fills the role of Paul Erdős. Our conclusion was that Cass Sunstein of the University of Chicago Law School plays that role in the legal academy. We then identified all those who have Sunstein number 1, *i.e.*, all of Sunstein's co-authors, as of January, 2007. That table is reproduced below as Table 1. Included here, for the first time, is a list of all Sunstein 2s, as of January, 2007. We will venture to keep this table up-dated and invite co-authors (and co-authors of co-authors) to keep us apprised of new papers.

---

<sup>‡</sup> Edelman is Professor of Law and Professor of Mathematics and George is Professor of Law at Vanderbilt University. Edelman is an Erdős 2 thanks to Peter C. Fishburn or Michael Ezra Saks, both of whom are Erdős 1s, and George is (now!) an Erdős 3 thanks to *Six Degrees of Cass Sunstein*.

<sup>1</sup> 11 GREEN BAG 2D 19 (2007).

MR. LINCOLN SETS A STYLE

DRUGGIST: "Try one of those pots, sir, and in three weeks you will be as hairy and handsome as he is."
