STATE NORMAL COLLEGE.

COURSE OF STUDY, ETC.

The State Normal College was opened with appropriate ceremonies at the Capitol, in Nashville, Tennessee, on Wednesday, the 1st of December, 1875, and is designed for the professional education of Teachers, and "practice in all grades of instruction." It constitutes the Literary Department of the University of Nashville, but is under the sanction of the State of Tennessee. It derives its support at present from the funds of the University and the "Peabody Education Fund." It receives as students young gentlemen and ladies from Tennessee or any of the States, and is designed, by the three Boards interested in its welfare, to become a center of educational influence for this and all neighboring States.

ADMISSION.

Persons applying for admission must not be under "sixteen years of age, nor over thirty." Candidates must present a certificate of good moral character; must declare their intention to become teachers, and their willingness to observe faithfully the regulations and perform the duties required while members of the institution, and pass a satisfactory examination in the ordinary grammar-school studies, viz.: Reading, Spelling, Writing, Grammar, Geography, Arithmetic, Elementary Geology and History of the United States.

Applications should be made to the Chancellor of the University.

DESIGN.

The State Normal College is strictly professional, and does not, where it can possibly be avoided, propose to undertake any work which can be as well performed in the ordinary schools or other institutions. The more thorough and complete the previous education of the student, the more valuable will be the advantages to be acquired at the College.

The institution designs to prepare its students, as far as possible, for the organizing, teaching, and general management of schools of different grades and higher educational institutions, both public and private. To effect this object the

COURSE OF INSTRUCTION

Requires that the student should possess a thorough knowledge—first, of the branches of learning required to be taught in the different grades of schools, and which should be, as far as possible, previously acquired; and, second, of the most economical and effective methods of teaching those branches. Consequently, the course of instruction embraces a rapid review of the more elementary studies with reference to the best ways of teaching them, a review of the higher branches of knowledge with the same object, and a careful study of such other branches as time and circumstances will permit. The scholastic year is divided into three terms.

STUDIES.

First Year.—Primary and Grammar-school studies, with reference to teaching them, viz.: Arithmetic, oral and written; Algebra, Geography, civil and physical, with Map-drawing; English Grammar and Analysis, History of the United States, Physiology and Hygiene, Rhetoric, Etymology, Book-keeping, Free-hand Drawing.

Second Year.—Geometry, Plane Trigonometry, Geology, Zoology, Botany, General History, Moral Science, Latin, Perspective Drawing.

Third Year.—Spherical Geometry and Trigonometry, Astronomy, Chemistry, Physics, English Literature, History and Constitution of the United States, with Civil Government; Latin, Psychology.

POST GRADUATE OR BACCALAUREATE CLASS.

Fourth Year.—Conic Sections, considered geometrically; Anylitical Geometry, Calculus, English Literature, Latin, German, Psychology, Model Drawing and Designing.

Such changes will be made in the course, from time to time, and such studies added, as circumstances may require.

The Latin, French and German languages, are taken according to a parallel course, and taught by the most improved modern methods. Drawing with black-board delineations, English Composition, Declamation, Reading, Spelling, Defining, Penmanship, Vocal Music, etc., receive attention throughout the year.

As this is designed to be a *strictly professional institution*, all studies, from the beginning to the end of the course, are taught with special reference to teaching them; and no study or exercise is deemed

satisfactory which cannot be readily reproduced in the same or a better manner.

Students are required, in every study, to occupy temporarily the place of the teacher of the class, subject to the criticisms of both teacher and classmates; and, at appointed times, the more advanced students are required to take the charge of the whole department, and give a short general lesson, subject also to criticism.

All studies are treated upon the topical plan, with such use of text-books as may be deemed advisable.

DISCIPLINE.

Students are expected to govern themselves as cultivated ladies and gentlemen, and to submit cheerfully to such rules as may be prescribed for the regulation of their studies, time, and general conduct during their connection with the College. If unable or unwilling to do this, they will be regarded as unfit for the responsible duties of the teachers' profession, and will not be retained.

CERTIFICATES AND DIPLOMA.

To such students as are able to remain at the institution only a portion of the time required for the full course, a certificate *may* be given, stating the time spent at the institution, and the general impressions of the teachers.

Those who complete satisfactorily the first two years of the course will be entitled to a certificate signed by the officers of the State Normal College and of the State Board of Education.

Persons who can remain for only a part of the time prescribed, and have an honorable discharge, will be allowed to resume and complete the course at a future opportunity.

The Diploma of the University is given to those only who have completed the entire course, and on all such the degree of "LICENTIATE OF INSTRUCTION" is formally conferred. A law of the State of Tennessee directs that "the possession of such Diploma shall exempt the holder thereof from the examination prescribed as a condition precedent to employment in the Public Schools of the State; any such graduate being eligible as a teacher in any county of the State."

Persons wishing to employ teachers who have been trained, wholly or in part at this College, are advised to inquire in all cases for the candidate's certificate of attendance, or, if a graduate, for the full Diploma and it is distinctly declared that these honors are not conferred unless the student is deemed worthy of them. In ordinary cases no other testimonial will be given.

Students holding scholarships, who enter the Senior Class, are required to remain at the College another year for still more advanced studies, and do not receive a Diploma until their course is *completed*, at which time the usual Baccalaureate degree of the University may be conferred.

TERMS, ETC.

The scholastic year commences on the first Wednesday in October, and closes on the last Wednesday in May. The year is divided into three terms, with but one regular vacation, *i. e.*, at the holidays. The daily sessions are short, and are designed to be actively employed in recitation, practice, etc., etc. All study and preparation for the student's work is to be done at his room.

LIBRARIES.

The College has access to the Library of the University—a select pedagogical library—and to those of the students' societies.

PHILOSOPHICAL AND CHEMICAL APPARATUS, ETC.

A large collection of well-selected apparatus has been recently purchased for the illustration of the various branches of Natural Science.

GEOLOGICAL AND MINERALOGICAL CABINET.

A very valuable and useful collection of Minerals has been procured, sufficient to illustrate the physical properties of all the more important species. To this is added a large Lithological and Paleontological Collection, containing casts of all the more important fossils and extinct species of animals, prepared by Prof. H. A. Ward—such as the Megatherium, Pleisiosauras, Glyptodon, etc.

EXPENSES.

Tuition is at present free. Every student, however, is expected to pay at the beginning of each term, \$2.00 for the use of such books as are provided by the institution, and for incidental expenses.

BOARD, ETC.

Board can be obtained in good families at prices varying from \$15 to \$20 per month—fuel and lights included.

Residents are allowed to board only in families approved by the President, and are not permitted to change their boarding places without his consent. Gentlemen and Ladies will not be allowed to board in the same place, and preference will always be given to such as expect but two to occupy the same room, and take no boarders except those belonging to the Normal College.

PEABODY SCHOLARSHIPS.

CIRCULAR OF THE GENERAL AGENT OF THE PEABODY EDUCATION FUND.

In view of the want of well established State Normal Schools of a high order in the South, the Trustees of the "Peabody Education Fund" contribute a part of the amount necessary to maintain a STATE NORMAL COLLEGE with superior facilities for instruction.

They have furthermore determined to establish in this College a number of Scholarships, of \$200 each, for the encouragement and aid of students from the different Southern States, whose characters, abilities, general culture and health give special promise of usefulness as teachers.

Applicants must have the *unqualified recommendation* of the State Superintendent of Instruction of their State, or of such persons as the President of the College may appoint, be accepted by President Stearns, declare their intention to make teaching a profession, and promise to teach two years, at least, in the Public Schools, if they have opportunity.

The standard of attainment should be such in general as is required of a graduate of a first class city High School. If, upon a half year's trial, reasonable expectations are not met, the scholarship will be discontinued. The longest period for which it will be given to any student is two years.

Application is to be made to President Stearns, through the State Superintendent of Instruction, or other examiner.

B. SEARS, General Agent.

February 18, 1880.

REQUIREMENTS.

r. The applicant for a scholarship must be at least 17 years of age, present to the President of the College a certificate of irreproachable moral character, gentlemanly or lady-like habits, presumed good health, declare his intention to make teaching a profession, must give a pledge to remain at the College two years, if the scholarship is continued so long, promise to submit cheerfully to all its requirements, in study, discipline, etc., and to teach in the Public Schools at least two years, if there is opportunity.

2. The applicant must obtain from the State Superintendent of Public Instruction for his State, or of such person as the President may appoint, a certificate that he has passed a satisfactory examination before said Superintendent, or other competent person duly authorized, in the studies required for admission to the second or "middle class" at the College, viz.: In Spelling, Reading, Penmanship, Grammar and Analysis, Rhetoric, Geography, civil and physical; Arithmetic, Algebra, Book-keeping, Physiology, United States History, Elements of Geology. No particular text-books are prescribed for this examination. The candidate should give evidence of such knowledge of the above branches as would justify omitting their further study. Students will also be examined at the College with reference to their classification, etc.

3. State Superintendents and other examiners are respectfully urged to make the required examination thorough and complete, and thus save the candidate from possible rejection, when he offers himself for acceptance at the College. Examiners should consider themselves responsible for the persons they recommend.

4. Gentlemen or ladies thus admitted who complete the prescribed course of study and training satisfactorily, graduate regularly, and receive from the proper authorities a diploma, admitting them to the degree of "LICENTIATE OF INSTRUCTION." ("L. I.")

5. Persons desiring to enter the senior class, will be examined at the College upon the studies of the middle class in addition to those prescribed above. Such students will not graduate with the senior class, but will pursue *still more advanced studies* another year; and, if character, attainments, etc., justify, will be admitted at the close of their course to the usual College or University degree of Bachelor of Arts, (B. A.). None, however, except regular graduates will be admitted to this class.

- 6. The Peabody scholarship money will not be paid until the student has been a member of the College one month, at which time, and at the close of each succeeding month, \$25 will be paid to an amount not exceeding \$200 for the year; no payment will be made for the fraction of a month. It is expected that this money will be appropriated by the student to the payment of board and other College expenses first of all; and no certificate or diploma will be granted to any student known to be in arrears in these respects.
- 7. These scholarships will, in no case, be continued to students whose rank or standing is low, whose general demeanor is objectionable, who do not give promise of usefulness as teachers, or whose health or other circumstances prevent constant attendance on College duties.
- 8. Expenses.—Gentlemen usually pay from \$15 to \$18 a month for board in approved boarding-houses or private families. Ladies pay in best private families, \$20 a month. \$6 a year is paid for the use of such books, etc., as are furnished by the College, and for a portion of the incidental expenses.

The Annual Session opens on the first Wednesday in October, and closes the last Wednesday in May. There is no vacation during the session, except the Christmas holidays.

Scholarship students will not be received after the opening of the session, except in extraordinary cases.

EBEN S. STEARNS,

President.

In view of the liberality of the Trustees of the Peabody Education Fund, and to carry out the design contemplated in the above circular more fully, it has been determined to make no charge for tuition in the case of those holding "scholarships," and that tuition shall also be free to all students from Tennessee, ladies or gentlemen, who intend to fit themselves for the teacher's profession. A charge, however, of \$2.00 per term will be made in every case for use of books and for incidental expenses.

By special arrangement with the Nashville, Chattanooga & St. Louis Railroad, the students of this College will be permitted to buy tickets to and from Nashville over this road and its branches at 3 cents a mile. The permits will be issued from the office of the President of the College. Students not having permits will be charged full fare.

PEABODY MEDALS.

Five Medals—two of silver and two of bronze—having been offered by the Trustees of the "Peabody Eucation Fund," for distinguished excellence in the Baccalaureate, Senior and Middle Classes, the following conditions of competition and award have been prescribed by the undersigned, a committee of award, appointed by the Executive Committee of the Board.

The names of the successful competitors will be given in a future catalogue.

As a first condition for competition, all candidates must be members of the Baccalaureate, Senior or Middle Classes, and must show that they have maintained an average of 90 per cent. as exhibited by the records of the instructors respectively, viz.:

- r. In constancy and punctuality of attendance upon daily sessions and all required exercises.
- 2. In general character, demeanor, and whatever appertains to general culture, as far as developed.
 - 3. In scholarship.
- 4. In ability to manage classes and impart instruction, as shown in the regular work of the College.

All students exhibiting said rank will be entitled to Honorable Mention in the Annual Catalogue of the University, over the signatures of the Committee of Award, and will be admitted to final competition for the Peabody Medals.

Members of the Junior Class exhibiting the rank required for competition in the other classes, and on the conditions prscribed for them, will be also entitled to Honorable Mention in the Annual University Catalogue.

At some session, during the month of May, all students in the Baccalaureate, Senior and Middle Classes, thus entitled to compete for the medals, will be assigned some topic connected with their professional work, on which they will be required to write an exposition or essay in the presence of the Committee, or some person appointed by them. These essays will be examined by the Committee respectively, and ranked according to merit, and the rank thus obtained will be added to the rank before mentioned and decide the award.

Governor, ALBERT S. MARKS, State Supt., LEON. TROUSDALE, Chancellor, EBEN S. STEARNS, Com. of Award app. by Executive Committee of Trustees of Peabody Education Fund.

HONORARY DEGREES.

The Trustees of the University of Nashville, at the Annual Commencement, May, 1879, conferred upon His Excellency, Governor Albert S. Marks, Hon. Neil S. Brown, and Hon. Archibald Wright, respectively, the degree of Doctor of Laws; upon Hon. Leon. Trousdale and Prof. Josiah A. Stearns, the degree of Doctor of Philosophy, and upon Prof. D. S. Robertson, Prof. James E. Scobey, and Superintendent Richard W. Weakley, the degree of Master of Arts.

THE PEABODY MEDALS

Were accorded to the successful competitors, viz.: Silver medal to Sallie B. Ewin, of the Baccalaureate Class, and Nettie C. Sergeant, of the Senior Class. Bronze medal to Eva Prather, of the Senior Class, and Aurine L. Williams, of the Middle Class.

The successful competitors for the present year will be announced in the next annual catalogue.

STUDENTS' SOCIETIES.

AGATHERIDAN LITERARY SOCIETY.

This Society, formed many years ago by the undergraduates of the University of Nashville, has been reorganized under the auspices of the State Normal College. Its design is to improve its members in discussion and oratory, and to cherish and foster the principles set forth in its motto: "Non nobis solum, sed patriæ et amicis."

At no time in its history has it been in a more flourishing condi-

^{*}Deceased.

tion, the active membership of the present scholastic year averaging forty.

An important feature of this Society is its library, which contains about two thousand rare and valuable books.

"THE GIRLS' CHAPTER."

The young ladies of the Normal College appreciating the advantages to be derived from a Literary Society, organized themselves toward the close of the session of 1879–80, under the name of "The Girls' Chapter." Their adopted motto is "To Be, not to Seem;" and, whether amid the social enjoyments which their meetings afford, or in the development and improvement of their mental powers, by readings, dissertations and discourse, this they intend shall be their constant aim. The success attending this Society during its short existence, gives promise of an abundant fruition during the coming years.

MONTGOMERY BELL ACADEMY DEPARTMENT.

EBEN S. STEARNS, D. D., Chancellor of the University.

JOSEPH W. YEATMAN, M. A., Principal and Prof. Nat. Science. S. M. D. CLARK, M. A., Professor of Ancient Languages. WILLIAM R. GARRETT, M. A., Professor of Mathematics.

This Department of the University was founded by the bequest of the late Montgomery Bell. It is designed to fit boys for college and for business. By the will of the Founder, gratuitous instruction is given to twenty-five boys, of not less than ten nor more than fourteen years old, "who are unable to support and educate themselves, and whose parents are unable to do so," from the counties of Davidson, Dickson, Montgomery and Williamson, Tennessee. It consists of two departments—High, or Academical, and a Grammar School: each having a three years' course of studies, selected and taught on the most approved modern methods.

Believing that, in its adaptation to the wants of the country, the system of training pursued and the advantages it affords for a com-

plete and thorough education, it is unsurpassed, it is offered with the greatest confidence to such as wish to prepare themselves for admission to any College or University, or for business pursuits.

COURSE OF STUDY.

GRAMMAR SCHOOL.

Junior Class—Arithmetic, Geography, Spelling, Reading, Composition, Declamation, Oral Exercises and Writing.

Middle Class—Arithmetic, Grammar, Geography, Spelling, Reading, Composition, Declamation and Writing.

Senior Class—Arithmetic, Grammar, Geography, United States History, Spelling, Reading, Composition, Declamation and Writing.

HIGH SCHOOL.

Junior Class—Arithmetic, Algebra, Latin, English History, Physiology, Physical Geography, Spelling, Reading, Composition, Declamation and Writing.

Middle Class—Algebra, Latin, Greek, Ancient History, Natural Philosophy, Chemistry, Spelling, Reading, Composition, Declamation and Writing.

Senior Class—Geometry, Latin, Greek, English Literature, Geology, Astronomy, Spelling, Reading, Composition, Declamation and Writing.

RATES OF TUITION.

Grammar So	chool,	, per	ye	ar					\$60	00
High School	, per	year							80	00
Contingent I	Fee				4				1	00

Fall Term begins September 6, 1880.

Christmas Vacation from December 20, 1880, to January 1, 1881. Summer Term closes June 12, 1881.

Application for admission should be made as early as possible in every case to Prof. J. W. YEATMAN, of the Montgomery Bell Academy.

ANNOUNCEMENT.

SESSION, 1880-81.

The Regular Course of Instruction in the Medical Department of the University of Nashville will commence on Monday, the fourth day of October next, and end on the last Thursday in February, 1881, which is Commencement Day.

On the 20th of September next, two weeks before the Lectures commence, the Anatomical Rooms will be opened for students. The facilities for the study of Practical Anatomy are complete.

COLLEGE BUILDINGS AND MUSEUM.

The buildings occupied by the Medical School and the Hospital form a large and commodious edifice of imposing appearance, fronting both on College and Market streets. The College building has been completely remodeled. A large and commodious Lecture Hall, capable of seating five hundred students, and provided with comfortable opera seats, has been erected. The seats are numbered and will be assigned to students in the order in which they matriculate. The building is heated by hot air furnaces, which insures perfect comfort during the coldest weather, and is ventilated by flues communicating with the furnace stack.

The Hospital will be enlarged by the addition of two wards and an Ampitheatre for Clinical and Operating purposes.

Besides there is a large and inviting Museum Room, together with two large and well ventilated Dissecting Rooms, Special Laboratories, Professors' and Apparatus Rooms, Janitors' Rooms, etc. The entire building is supplied with water and gas.

The Museum is noted for its extent, and the value and variety of its Anatomical, Physiological, Pathological, Surgical and Obstetrical Specimens, and for its Cabinet of Materia Medica. It has been recently re-arranged, and rendered more complete by new additions. The Chemical portion is well supplied with medicinal substances and

preparations, and such other articles as may be required in the elucidation of the theory and practice of Chemistry and Pharmacy.

METHOD OF TEACHING.

It is the purpose of the Faculty to make the teaching thorough and practical. Five Lectures will be delivered daily, in the College Halls, upon the different subjects of the course. During the week, the Student will hear four Lectures upon each branch of Medicine. Daily examinations or reviews will be held by each Professor at the beginning of his hour, in order that the facts of the previous lecture may be impressed upon the minds of Students. The various courses will be illustrated by models, anatomical, botanical and chemical specimens, experiments, dissections, clinics and surgical operations, and by such other means as may make the instruction imparted practical and pointed. The Cabinets of Anatomy, Physiology, Pathology, Obstetrics, Surgery, Materia Medica and Chemistry, are richly supplied with Preparations and Specimens, which will be used as occasion demands.

The Chair of Obstetrics, in addition to its full supply of Models in Wax, Apparatus and Instruments, has recently had added to it Modern Plates and Diagrams, making complete its equipage for the elucidation of the entire Course. The Cabinet of Materia Medica has also been liberally supplied with Plates, representations of Medicinal Plants, specimens of Drugs and Chemicals, and all the appliances for the illustration of this branch.

HOSPITAL AND CLINICAL INSTRUCTION.

The Hospital building, erected by the Faculty, and under their exclusive control, has a frontage of one hundred and fifty-four feet, with other dimensions in proportion, and adjoins the College edifice. Its wards, well filled at all times with material for Surgical and Medical teaching, are immediately accessible from the Lecture Halls. This is a peculiar feature, enjoyed by few medical institutions, and one which has been pronounced by visitors, of large experience as teachers, very superior and excellent in arrangement.

Twice a week Surgical Clinics are held and Operations performed, when necessary, in the presence of the class. The number of these operations is large, and the variety great, embracing every Surgical disease and injury, with the Surgical operations of the Eye and Ear.*

^{*}All charity patients will be treated for disease or be made the subject of necessary operations before the Class free of charge.

The Obstetrical Ward of the Hospital will be under the Clinical control of the Professor of Obstetrics and his Assistant. It is designed to render Students familiar with the practical details of Parturition, by assigning to their care, under the supervision of the Professor or Assistant, such cases as may be available, not only in the Hospital, but in private practice also. In this way it is proposed to teach them to diagnose the various presentations and positions, more fully to comprehend the mechanism of labor, and give them facility in manual manipulation and instrumental delivery.

The facilities enumerated supply the Professors of Surgery, Obstetrics, Practice, Clinical Medicine, etc., with a field for the thorough teaching of disease, as seen at the bed-side, unsurpassed by any institution in the country.

PRACTICAL ANATOMY.

The Anatomical Rooms, which are under the general direction of the Demonstrator, are abundantly supplied with fresh and wholesome material. The Demonstrator will be present every evening to direct and assist in dissections. Students will be taught the art of injecting, preparing and preserving specimens, both wet and dry; also the manner of making corroded specimens of the vessels, tubes and ducts of the various organs. At the proper time, Classes in Operative Surgery will be formed, and each Student will receive practical instruction upon the Cadaver, in the application of the bandage, in the ligation of arteries, and in the performance of amputations, resections, etc. This Department will be opened on the 20th of September.

GRADUATION.

I. To graduate, the candidate must have attained the age of twenty-one years, and be of good moral character.

II. He must have attended two full courses of Lectures, the last of which must have been in this Institution. If the candidate has attended a full Course of Lectures in a regular Medical School, he may, by attendance upon a full Course of Lectures in this Institution, present himself for graduation. It is required also, that the Dissecting Ticket be taken for at least one session.*

^{*}A graduated scheme of study, extending through three years, has been arranged for the accommodation of such Students as wish to pursue a more prolonged course. This, though strongly recommended, is entirely optional with the Student. The scheme is as follows:

III. He must have studied medicine for three years (or at the least thirty-three months) under a regular practitioner, the three years to include the time of attendance upon two courses of lectures.

IV. The candidate is elected by ballot, and upon receiving THREE NEGATIVE votes will be rejected; but will be entitled to another examination by appearing before a full Faculty, after all other applicants have been examined. No premature examination will be GRANTED EXCEPT BY CONSENT OF THE ENTIRE FACULTY.

Candidates will not be registered for examination until all fees are paid.

FEES.

Matriculation (paid but once) .						 \$ 5	00
Professors' Ticket						50	00
Dissecting Ticket						 10	00
Graduating Fee	. /.	,				30	00

A consultation among Medical Colleges is now being held with reference to the establishment of a uniform rate of fees. Should any change be made due notice will be given.

NO CHARGE IS MADE FOR THE PRIVILEGE OF THE HOSPITAL.

Students, upon their arrival, will call at the Secretary's office, and, after registering their names, pay for their tickets.

TEXT BOOKS.

Anatomy: Grav.

Anatomy: Gray.

Surgery: Billroth, Paget, Gross,

Erichsen, Bryant,

Obstetrics: Leishman, Playfair.

Diseases of Women: Thomas or

Barnes.

Diseases of Children: Smith.

Dictionary: Dunglison.

Physiology: Kirke, Dalton.

Materia Medica: Stille, Waring.

Chemistry: Attfield, Fownes, Roscoe.

Theory and Practice: Watson and

Aitken.

Ear: St. John Roosa.

Eye: Carter, S. Wells.

⁽¹⁾ The Student may confine his attention for two full courses to anatomy, chemistry, materia medica and physiology, and after the end of the second course be examined upon these subjects.

⁽²⁾ Such Student, during the third course, to devote himself chiefly to lectures upon the theory and practice of medicine, surgery, obstetrics and diseases of women and children, upon which subjects only he shall be examined at the final examination for the degree of M. D., his standing, however, to be determined by the result of both examinations.

DIRECTIONS TO STUDENTS.

It will be best for Students, upon arriving in the city, to take a hack, and, with their baggage, go immediately to the *Hospital and College Buildings*, on *South College Street* (between Franklin and Priestly streets), where they can obtain assistance in securing such boarding-houses as they may desire.

Boarding can be obtained at from three and a half to five dollars per week.

Communications and letters asking information should be addressed to Dr. J. M. SAFFORD, Sec'y., Nashville, Tenn.
