

LIST OF FIGURES

Figure	Page
1. Modified one-phase Brust reaction.....	3
2. Examples of thiolate ligands for water-soluble gold nanoparticles	4
3. Place-exchange reaction scheme.....	5
4. Place-exchange reaction rates at different sites	6
5. Crystal structure of the PMDA nanocluster.....	8
6. Cartoon of a solid-phase place-exchange	9
7. Cartoon of the QCM antibody biosensor	13
8. Chemical structures of glutathione and Tiopronin.....	15
9. Comparison of epitope presentation on 2-D and 3-D surfaces	16
10. Creation of peptide functionalized nanoparticles	17
11. Bidentate and monodentate ligands on MPCs	18
12. Au ₅₅ clusters in the backbone of DNA	21
13. TEM of Ebolavirus	28
14. Viral proteins of ebolavirus	29
15. Oscillations of a TSM crystal	31
16. Frequency and resistance changes with sucrose	33
17. Cartoon of a antibody QCM biosensor to ebolavirus GP	42
18. Massogram of the detection of Zaire GP	44
19. Concentration plot of Zaire and Sudan-Gulu GP.....	46
20. Langmuir plot of Zaire and Sudan-Gulu GP.....	46

21.	Detection of GP with 6D11.....	47
22.	Langmuir plot of 6D11	48
23.	IgM 17A3 based sensor for Ebola GP	49
24.	Polyclonal antibody detection of GP	50
25.	Cyclic voltammogram of SAM on QCM crystal.....	52
26.	Massogram of aminoethanethiol monolayer.....	53
27.	Repeated detection of ebola GP on BS3 crosslinked surface	55
28.	Cartoon representation of ebolavirus the relative locations of proteins	62
29.	Detection of the whole Ebolavirus pathogen.....	67
30.	Control experiment of Ebolavirus vs. anti-mouse IgG	68
31.	Reverse control with MAB-1 against H3N2 virus.....	69
32.	Characterization techniques for TMPCs.....	77
33.	Reaction scheme for making cyt-c-MPC nanocomposites	78
34.	MALDI-TOF MS of the thiolated cyt-c.....	81
35.	3-D UV-Vis plot of the CFFE separation	83
36.	CV of cyt-c on a bare gold surface with and without viologen	84
37.	Conjugated MPC-cytochrome CV	85
38.	Control experiment measuring MPCs in solution.....	86
39.	CVs of the buffer solutions used in the experiments.....	87
40.	Timeline of the mouse injection and sampling	95
41.	Calibration curve of TMPCs in ICP-MS	99
42.	Survival curve (LD50) for injections.....	100
43.	TMPCs concentration in urine over time.....	101

44.	Clearance profile of TMPCs in blood.....	102
45.	Concentration of TMPCs in the organs	103
46.	UV-Vis spectra of TMPCs in blood.....	104
47.	Ratio of RBC:WBC over 4 weeks	105
48.	Histology sections showing kidney damage	106
49.	Organ concentration of size separation TMPCs	108
50.	Clearance of TMPCs in blood (a) and urine (b)	109
51.	DTT cleaved HA antibody.....	114
52.	Protein A reacted with Traut's reagent	114
53.	EDC/NHS coupling of HA-antibody to Protein A	115
54.	Thiol-acid SAM activated with EDC/NHS.....	115
55.	20 uM histology sections	116
56.	More histology from the 40 uM injection group	117
