

**CORRELATING MR RELAXATION MEASUREMENTS WITH CORRESPONDING
PROTEOMIC INFORMATION PROVIDED BY MALDI IMS**

By

Zhengyu Yang

Thesis

Submitted to the Faculty of the
Graduate School of Vanderbilt University
in partial fulfillment of the requirements
for the degree of

MASTER OF SCIENCE

in

CHEMICAL AND PHYSICAL BIOLOGY

December, 2009

Nashville, Tennessee

Approved:

Professor John C.Gore

Professor Bruce M.Damon

Professor Richard M.Caprioli

Professor Hassane S.Mchaourab

ACKNOWLEDGMENT

I would like to express my gratitude to all those who gave me the possibility to complete this thesis. Especially, it is my honor to have Dr. John Gore as my mentor through this difficult project. I would never get what I have so far without his guidance. His unparalleled expertise in I would also like to thank Dr. Tuhin Sinha, who introduced me into this project and helped me whenever I got any problems.

I am also deeply appreciative of the assistance of my colleagues in vanderbilt institute of imaging science, Mary Loveless, Daniel Colvin, Amelie Gillman for helping me collecting and analyzing the data. Zou Yue, Chaohui Tang and Jarrod True helped me setup the experiment and prepare the animals. Erin Seeley and William Hardestry in Mss Spectrometry Research Center helped me with the sample acquisition and protein analysis. Without their help, this work would have been impossible to done.

Finally, to my loved families, my wife Xiaowen Wang and my mother Yongping Li, your continuously support and patient love helped me through a lot difficulties and enabled me to complete this work.

TABLE OF CONTENTS

ACKNOWLEDGEMENTS.....	ii
LIST OF FIGURES AND TABLES.....	iv
Chapter	
I. CORRELATING MR RELAXATION MEASUREMENTS WITH PROTEOMIC INFORMATION PROVIDED BY MALDI USING C6 GLIOMA TUMOR MODEL.....	1
Introduction.....	1
Background.....	2
Relaxation Theory.....	2
Theoretical Model.....	6
Matrix-assisted Laser Desorption Time-of-Flight Mass Spectrometry.....	8
Data Analysis.....	10
Methods.....	11
Animal Model and preparation.....	11
MR acquisition.....	12
MALDI acquisition.....	14
Co-registration.....	16
Correlation analysis.....	18
Results and Discussion	20
II. CONCLUSION.....	30
REFERENCE	33

LIST OF FIGURES AND TABLES

Figure	Page
1. Diagram of a MALDI apparatus.....	9
2. Sample images of MR acquisition	13
3. Example blockface images.....	15
4. Photos of tissues on MALDI plate.....	16
5. Co-registration flow chart.....	17
6. Quantitative M0,T1 and T2 maps.....	21
7. Groups of eigenmimages used to derive protein variation pattern.....	22
8. Comparison of mean mass spectra.....	23
9. Correlation results for ROIs near the eye.....	25
10. Correlation results for ROIs in muscles.....	26
11. Correlation results for whitematter ROIs.....	27
12. Interslices comparison of correlation results before and after M0 correction in ROIs of whitematter	28
13. Interslices comparison of correlation results before and after M0 correction in ROIs of muscle.....	28
14. Interslices comparison of correlation results before and after M0 correction in ROIs of tissue around the eye.....	28
 Table	
1. Groups of proteins and peptides identified for ROIs of muscle whitematter and tissue around eye area and their changes relative to the mean across sections.....	24
