

ACKNOWLEDGEMENTS

This work was made possible with the financial support from the National Institute of Health. I am grateful to all the members of Yang Lab, past and present, with whom I had the pleasure to work. I am grateful to members of my Dissertation Committee, who each have spent a generous amount of time and effort to teach me about scientific research. I especially thank Dr. Elizabeth Yang, my teacher and mentor, who has managed to make a scientist out of me. I am grateful to all the past members of the Yang lab, especially Anuja Chattopadhyay, ChiWu Chiang, and Courtney Greider, who have been instrumental in my development as a scientist. I am grateful to all the present members of the Yang lab, with whom I had the pleasure to work.

Nobody has been more eager to see me succeed than my family. I thank my parents, who have been incredibly loving and supportive. Many thanks to my husband, who has helped me through the last, difficult years of graduate school.

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	iv
LIST OF FIGURES	viii
Chapter	
I. INTRODUCTION.....	1
The Bcl-2 family	1
Bcl-2 and Bcl-x _L	4
Bad	7
Bak/Bax.....	8
Apoptosis	8
Mitochondria.....	9
Caspases.....	13
Bcl-2 and the Cell Cycle.....	14
Cell Cycle and Quiescence	17
Myc.....	20
Cyclin-dependent kinase inhibitor p27.....	21
Akt/PKB.....	22
Summary.....	23
II. MATERIALS AND METHODS.....	25
Cell culture.....	25
Murine T cell isolation	25
Retroviral infection.....	26
Cell Cycle Analysis	26
Immunoblots	27
RNA/DNA staining	28
ATP measurements.....	28
TMRE and MTG staining of mitochondria	28
III. BCL-2 AND BCL-X _L DELAY CELL CYCLE ENTRY BY ENHANCING G ₀ ARREST.....	30
Introduction.....	30
Results.....	31
Y28Bcl-2 mutation was not able to separate the cell death and cell cycle functions of Bcl-2	31

	Subcellular localization was not able to separate the cell death and cell cycle functions of Bcl-x _L	34
	Activation of Myc and cyclin D proteins during cell cycle entry is unaffected by Bcl-x _L and Bcl-2, but cyclin/cdk activities are inhibited.....	36
	Bcl-x _L does not affect the rate of exit to G ₀ in NIH3T3 cells.....	39
	Bcl-x _L delays the increases in RNA accumulation and cell size during stimulation of cell cycle entry	41
	Bad expression reverses the effects of Bcl-x _L on cell size and RNA content.....	46
	Bcl-x _L expression enhanced G ₀ arrest	50
	Summary	52
IV.	BCL-2/BCL-X_L MAY ACT ON THE MYC PATHWAY TO DELAY CELL CYCLE ENTRY	
	Introduction.....	56
	Results.....	56
	Bcl-x _L and Bcl-2 expression does not delay S phase entry in myc ^{-/-} cells	56
	p27 is not elevated in Bcl-2/Bcl-x _L expressing myc ^{-/-} cells	58
	Bcl-2/Bcl-x _L does not affect the ability of Myc to transcriptionally regulate p27	60
	Overexpression of p27 in myc ^{-/-} cells slows cell cycle time	62
	Bcl-x _L expression delays S phase entry in cells with reduced Myc expression.....	64
	Summary	66
V.	BCL-2/BCL-X_L REGULATES CELL CYCLE BY MECHANISMS INDEPENDENT OF APOPTOSIS INHIBITION	
	Introduction.....	68
	Results.....	70
	zVAD-fmk partially recapitulates the Bcl-x _L cell cycle delay phenotype	70
	zVAD-fmk treatment of Rat1MycER cells does not recapitulate the Bcl-2 cell cycle phenotype	76
	Caspase 9 dominant negative mutant partially recapitulates the Bcl-x _L cell cycle delay phenotype in NIH3T3 cells.....	78
	Caspase 9 dominant negative mutant does not affect cell cycle arrest or entry in Rat1MycER cells.....	80
	Inhibition of cell death in FL5.12 cells by mAkt does not recapitulate the Bcl-x _L cell cycle phenotype	83
	Bcl-2/Bcl-x _L delays the increase in ATP content during cell cycle entry in NIH3T3, Rat1MycER, and primary T cells	85
	Elevated ATP does not reverse the cell cycle effect of Bcl-x _L	90
	Bcl-x _L cells exhibit lower MMP during cell cycle arrest.....	92

Bcl-x _L delays cell cycle entry in 143B p0 cells.....	96
Summary.....	98

VI. CONCLUDING REMARKS AND FUTURE DIRECTIONS

Concluding Remarks	106
Future Directions.....	108
The effect of Bcl-2/Bcl-x _L on cell growth pathway regulators ...	110
The effect of Bcl-2/Bcl-x _L on Myc's cell growth function	115
Models of Bcl-2/Bcl-x _L Function.....	117
The effects of Bcl-2/Bcl-x _L on autophagy.....	117
The effects of Bcl-2/Bcl-x _L on mitochondrial fusion/fission	119
Retrograde signaling	120

LIST OF FIGURES

Figures	Page
1. Diagram of representative members of the Bcl-2 family.....	3
2. Bcl-2 family members in receptor- and mitochondria-mediated apoptosis	10
3. Bcl-2 and Bcl-x _L delay serum stimulated, Raf-induced, Myc-induced, but not E2F-1-induced cell cycle entry	16
4. Molecular events and phases of cell cycle progression	18
5. Y28F-Bcl-2 inhibits Myc-induced cell cycle entry and Myc-induced apoptosis..	32
6. Y28F-Bcl-2 delays serum-induced cell cycle entry.....	33
7. Bcl-2 targeted to the endoplasmic reticulum or the mitochondrial outer membrane retains cell cycle delay activity.....	35
8. Induction of Myc and cyclin D is not affected by Bcl-x _L during cell cycle entry.	37
9. Bcl-x _L does not increase the rate of G ₀ entry	40
10. Bcl-2 expression retains cells in G ₀ during serum-stimulated cell cycle entry following serum starvation.....	42
11. Bcl-2 expression retains cells in G ₀ during serum-stimulated cell cycle entry following contact inhibition	44
12. Bcl-2 transgenic murine T cells are smaller in size and contain less RNA than wild type T cells.....	45
13. Bcl-x _L delays cell size and RNA increase following cell cycle stimulation, which is reversed by Bad expression	47
14. Enhanced G ₀ arrest contributes significantly to the cell cycle delay function of Bcl-x _L	51
15. Enhanced cell cycle arrest is the major mechanism of Bcl-2/Bcl-x _L -mediated cell cycle entry delay	55
16. Bcl-2/Bcl-x _L expression does not delay S phase entry in myc ^{-/-} cells	57
17. Bcl-2 expression in myc ^{-/-} cells did not result in p27 elevation	59
18. Bcl-x _L does not affect the transcriptional repression of p27 by Myc	61
19. myc ^{-/-} cells overexpressing p27 exhibit a slowed growth rate and a delayed cell cycle re-entry	63
20. Bcl-x _L delays cell cycle entry in cells with knocked down Myc.....	65
21. Knocking down Myc results in elevation of p27.....	67
22. zVAD-fmk-treated NIH3T3 cells exhibit a partial cell cycle phenotype	71
23. zVAD-fmk-treated NIH3T3 cells do not exhibit enhanced G ₀ arrest.....	73
24. zVAD-fmk-treated NIH3T3 cells do not upregulate p27 during cell cycle arrest	75
25. zVAD-fmk-treated Rat1MycER cells do not exhibit delayed cell cycle entry	77
26. NIH3T3 caspase 9 DN exhibit a partial cell cycle delay phenotype	79
27. NIH3T3 caspase 9 DN do not exhibit enhanced G ₀ arrest.....	81
28. Rat1 caspase 9 DN cells do not exhibit a cell cycle delay phenotype	84
29. Rat1MycER caspase 9 DN cells do not exhibit enhanced G ₀ arrest.....	86
30. Induction of mAkt in the FL5.12 cells.....	88
31. FL5.12 cells expressing mAkt are protected from cell death.....	89
32. FL5.12 mAkt cells do not exhibit enhanced G ₀ arrest	91

33. Peak ATP is delayed in cell lines and primary T cells expressing Bcl-x _L /Bcl-2...	93
34. Elevation of cellular ATP does not reverse the cell cycle delay phenotype of Bcl-x _L	95
35. Bcl-x _L may regulate mitochondrial membrane potential or number.....	97
36. Bcl-x _L does not enhance cell cycle arrest in 143B ρ0 cells.....	99
37. Diagram of the electron transport chain and other major components of mitochondrial membranes	104
38. Bcl-2/Bcl-x _L regulates cell cycle arrest by mechanisms in addition to cell death inhibition	109
39. Bcl-x _L may control cells growth by affecting the pathways that regulate cell growth, such as the mTOR or the c-Myc pathways.....	111
40. Possible modes of action for Bcl-2/Bcl-x _L in cell cycle arrest	121
